

Single Pod Self Contained Cabin

This single pod with en-suite and kitchenette can act as a small stand alone self contained accommodation unit.

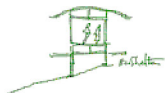

The front consists of four timber framed glazed doors which may be sliding or bifold opening.

The side walls are solid panels with central paired glass doors.

The standard ensuite extension has been split with a WC and vanity and corner shower on one side and Kitchenette with storage cupboards and wall mounted, hot water system on the other.

The highlights use vent panels for natural venturi stack ventilation of the building.

This unit will require power supply (solar system and battery bank available), water supply (rainwater tank available) and sewer drainage to be supplied on site.
